SPECIAL APPLICATION ENCLOSURE
Sprinkler Cabinet
HYDRANT CABINET

Shield Main Brand Hydrant Cabinets :

hydrant cabinets are designed to store fire equipment, including hose, nozzle, hydrant wrench, pin wrench, fire extinguisher, and rubber washer.

These cabinets are made from mild steel or stainless steel with a sheet thickness ranging from 1.0 to 2.0 mm.

Shield hydrant cabinets are self-standing.To enhance durability and environmental resistance, the cabinets are coated with anti-corrosive coatings and electrostatic powder paint in a baked Finish.

This ensures water resistance and protection against rust and corrosion .

All models are offered with standard accessories and optional components (depending on project requirements).

Sprinkler Cabinet

Sprinkler Head Storage Box This sprinkler storage box is specifically designed for the organized and secure placement of spare sprinkler heads. The unit features a durable steel body with powder coating for corrosion resistance and a hinged top lid for easy access . The interior slots allow for safe and separate positioning of each sprinkler head, preventing damage during storage and ensuring quick access during maintenance or replacement . Ideal for fire safety rooms, mechanical spaces, and maintenance facilities .

Original Shield sprinkler boxes are made of mild steel with a thickness of 100 to 200 mm or stainless steel in accordance with technical instructions.

They are made of steel .

These boxes come in various sizes and can hold 6, 12, 24 or 36 sprinkler nozzles.

They also have enough space for special wrenches and other tools.
